DETAILED ACTION

1. This Application has been examined. The claims 1 and 3-6 are allowed.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to an apparatus comprising a wireless receiver to receive a textual message that includes a plurality of words including a first word segment and second word segment, wherein the first and second word segments each comprises more than one word of the plurality of words and wherein the second word segment sequentially follows the first word segment. The combination of the closest prior art of Deluca et al. (US 4,952,927) and Bluthgen et al. (6,693,636) show a similar invention, however, they fail to teach a display being of sufficient size to accommodate simultaneous display of both the first and second word segments; a processor operable coupled to the wireless receiver and the display and being configured and arranged to sequentially display the first and second word segments using the display, wherein the display is controlled such that the first word segment is displayed during a first time period and the second word segment is displayed during a second time period, the second time period following completion of the first time period, such that the first word segment is displayed on the display without the second word segment and the second word segment is displayed on the screen without the first word segment as claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
